Portfolio: <https://marcelino05052000.github.io>

PROFESSIONAL SUMMARY

Full Stack Developer with 3+ years of professional experience, specializing in **frontend development with React** and modern JavaScript/TypeScript tooling. Bachelor in Computer Science (UFAPE) with a strong foundation in software engineering, relational and NoSQL databases, and microservice architectures. Proven track record of progressing from Trainee to Full Stack Developer at Elife by consistently delivering bug fixes and new features that improve platform reliability for end customers. Frontend is where I'm most effective; I also contribute to **Node.js** backend services and **React Native** mobile development as the team needs, with growing experience across the full stack.

TECHNICAL SKILLS

Frontend	React, Vite, React Native, Angular, HTML5, CSS3, JavaScript (ES6+), TypeScript
Backend	Node.js, Express, RESTful APIs, Ruby on Rails, Laravel (PHP)
Databases	PostgreSQL, MongoDB, SQL & NoSQL modeling
DevOps & Tools	Docker, RabbitMQ, Git, GitHub, GitHub Pages, CI/CD basics
Languages	Java, C, Python (data analysis), Kotlin (mobile)
Practices	Microservices communication, Agile workflows, code review, debugging in production

PROFESSIONAL EXPERIENCE

Full Stack Developer

June 2025 – Present

Elife · Garanhuns, PE — Brazil

- ▶ Expanded responsibilities across the full stack, contributing to the company's customer-facing platform with **React/Vite** on the frontend and **Node.js** services on the backend.
- ▶ Started building the company's **React Native** mobile application, translating existing web features into a performant cross-platform experience.
- ▶ Deliver bug fixes and new features end-to-end — from requirements clarification through deployment — while keeping production stability for end customers.

Frontend Developer

March 2024 – June 2025

Elife · Garanhuns, PE — Brazil

- ▶ Owned frontend development of platform features using **React**, improving UI consistency and reducing recurring customer-reported issues.
- ▶ Collaborated with backend engineers to refine REST API contracts, accelerating delivery of new screens and workflows.
- ▶ Promoted from Trainee after consistently shipping production-ready code and demonstrating ownership of frontend tasks.

Full Stack Trainee Developer

March 2023 – February 2024

Elife (CXPRESS product) · Garanhuns, PE — Brazil

- ▶ Worked across the stack on the **CXPRESS** platform using **React** (frontend), **Node.js** (backend), **PostgreSQL** and **MongoDB** (databases).
- ▶ Operated within a containerized environment with **Docker** and asynchronous communication via **RabbitMQ**, gaining hands-on experience with microservice patterns.
- ▶ Took on increasing responsibility in feature delivery and bug-fixing cycles, leading to promotion to Frontend Developer.

Apprentice Developer (Young Talents Program)

September 2022 – February 2023

Elife · Garanhuns, PE — Brazil

- ▶ Selected for Elife's **Young Talents** program; trained intensively on modern web development tooling and team collaboration practices.
- ▶ Built foundational skills across frontend and backend technologies that led to a full-time Trainee offer at the end of the program.

EDUCATION

Bachelor's Degree in Computer Science

August 2019 – March 2024

Federal University of Agreste of Pernambuco (UFAPE) — Garanhuns Campus

Technical Degree in Information Technology (High School Integrated)

February 2014 – December 2018

Federal Institute of Pernambuco (IFPE) — Garanhuns Campus

CERTIFICATIONS & CONTINUOUS LEARNING

- ▶ Full Stack Course: MongoDB, Node.js & React Native
- ▶ SQL & NoSQL Databases — Basic to Advanced
- ▶ Microservices Communication
- ▶ Git & GitHub — Basic to Advanced (incl. Gist & GitHub Pages)
